

A close-up photograph of a red forklift's rear wheel and tire. The tire is black with a deep tread pattern. The wheel hub is red. In the foreground, a bright yellow safety line is painted on a grey concrete floor, forming a chevron shape. The background is slightly blurred, showing the red body of the forklift and some mechanical parts.

Finding your way

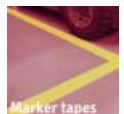

Marker tapes
made by LÖW ERGO

How to stay on track

Marker tapes made by LÖW ERGO are forerunners in production plants, storage buildings and on factory premises on the whole. They show vehicles and employees where to go. This provides for safe loading and unloading. Forklifts stay on track, and visitors find their way around.

LÖW ERGO offers tapes in various colours and for numerous purposes in the visual marking of traffic routes in the workplace. They are fast to lay, easy to remove, and durable. Thanks to their excellent adhesive qualities, they are suitable for all common industrial floors such as concrete, cast plaster, resin, stone, PVC tiles, and metal.

Get your employees and visitors on track with marker tapes made by LÖW ERGO.

Marker tapes for path-breaking work

Excellent properties

- plane and smooth surface
- easy to clean
- extremely flat edges
- resistant to mechanic damage
- tapered sealing lip
- no visible hem

Instructions for use
