

LÖW ERGO

The ergonomic workplace experts

# Joint Protection

Workplace mats  
made by LÖW ERGO

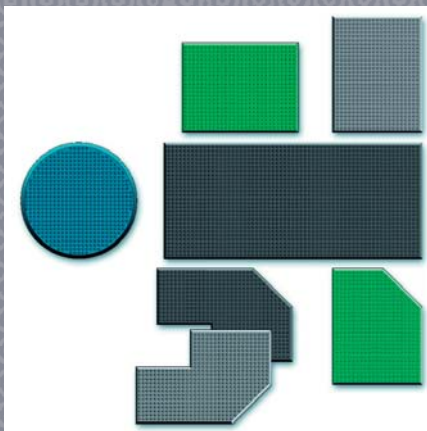

## Standing on solid ground

Industrial flooring requirements are abrasive-ness and durability. For the people who work on them, this truly means hardship. The workplace mats we produce at LÖW ERGO do not only help absorb pressure but also relieve bone structure and skeletal muscles. At the same time, they provide safe standing, prevent slipping, and protect the floor. Your production employees will work without getting tired und stay concentrated. They will be motivated, ready to perform, and they will stay healthy.

We deliver workplace mats in various designs for all requirements in dry and wet work environments such as slip-stoppers for fast movements, mats for individual workplaces, and running metres for entire production plants.

# Safe standing on workplace mats in production areas

## Nitril NBR Chamber

Durable workplace mats in laboratories

They resist almost anything and protect the joints. Even on wet floors, they provide for safe and comfortable standing.

- resistant to common industrial acids, bases, and oils
- adhesive due to chambers on the bottom side
- with nubbled or smooth, anti-slip surface
- special sizes available

Sky-Trax

Sof-Tred

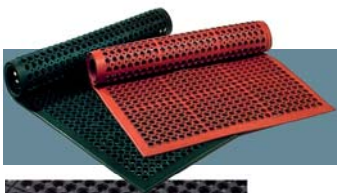

Cushion-Trax

## Vinyl

Skid-proof in dry environments

They insulate cold floors, absorb sound, and have elastic qualities.

- quickly installed on tracks
- provide for stress-free, joint-protecting work
- three designs for safe standing

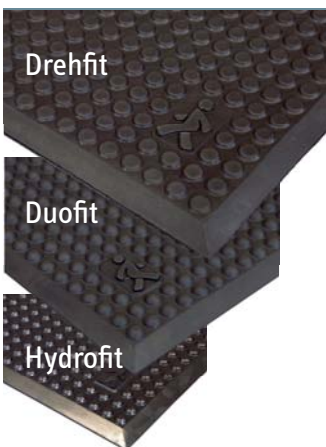

## Nitril NBR punched

For dry feet in wet rooms

Fluids will emerge through the holes, while the non-slip mats stay on the ground.

- anti-tiring effect due to elastic rubber
- resistant to chemicals and oils
- available in three designs

Drehfit

Duofit

Hydrofit

## Werkstep

The classical solution for dry environments

They effectively relieve the musculoskeletal system. Various surfaces are designed to suit different courses of movements.

- Drehfit for fast rotations
- Classic Pur for more standing comfort
- Duofit für safe standing
- Hydrofit resistant to oils, bases, and acids
